

What we build, and what it costs.

A plain-English guide to everything Suncoast Technology offers — what each service is, how it helps your business, and what it's best for. Build packages are flat-rate once scope is confirmed; larger projects split into a deposit plus milestone payments, and every invoice is itemized so you always know exactly what you're paying for.

How billing works

Care plans bill monthly (or annually at a discount) by card or bank transfer. Build packages and projects are quoted up front and itemized line-by-line on every invoice, with larger builds split into a deposit plus milestone payments. We accept card, Apple Pay, Google Pay, bank transfer (ACH), and pay-over-time options — so you can pay however suits you best.
